## Company Information

Gordon McWilliam (Aberdeen) Ltd. Commenced trading in 1959 as a retail butcher operating from shops in Aberdeen. In the late 1970s the company expanded into the catering industry and acquired industrial premises in 1984 to meet customer demand.

In 1991 the company was taken over by current Director Mr Michael Lawrie. Mr Lawrie has nurtured and developed the company to its present position. In April 1997 we moved the company to a purpose built premises on St Cement Street, Aberdeen, which has equipment and facilities of the highest standard.

The location of the premises at the heart of Aberdeen makes G McWilliam ideally situated for supplying a large number of leading hotels, restaurants, schools and hospitals with top quality beef, pork, lamb poultry, game and cooked meats, as well as sausage, burgers and puddings which are all manufactured onsite.

The Company operates to a very high standard and will only purchase raw materials from approved suppliers. From farm to fork, stringent quality procedures are in place to ensure product quality, product safety and ultimately, customer satisfaction.

G McWilliam is one of only a few Scottish Butchers to be BRC (British Retail Consortium) Global Food Safety accredited. We are also an approved cutting plant audited regularly by the FSA (Food Standard Agency).

Mr Lawrie recognises that the company operates in a dynamic industry, which means that the company must constantly evolve with customer expectations being met. This has led to consistent progression throughout the factory and business.

Increased demand and a greater market share saw the company investing in the building of a new storage facility for frozen, chilled and ambient goods. Increased storage space has led to an increase in product range and flexibility of storage options.

G McWilliam is committed to the continuous improvement of standards within the factory. All staff are trained in basic food hygiene and the company has recently gained an approval from REHIS (Royal Environmental Health Institute of Scotland) to train staff in Food hygiene, HACCP (Hazard Analysis Critical Control Points) and Health & Safety. The HACCP system is the backbone to the company's Food Safety Management System which is operated by a full time Technical Manager.
